

One Time Setup

1. Make a channel Points reward with the name of wild Pokemon
2. Add the extension to your channel:
<https://dashboard.twitch.tv/extensions/pfkqgewjksojpg6o6wcolaf5sot5jt-0.1.1>
3. Set the prices of each action, by configuring the extension.
4. Open setup.exe

1. Write your twitch channel's name
2. Press GET TOKEN
Accept and authorize
Copy The TOKEN
(This token will be used to read channel
Points rewards)
3. Paste the TOKEN
4. Press Done

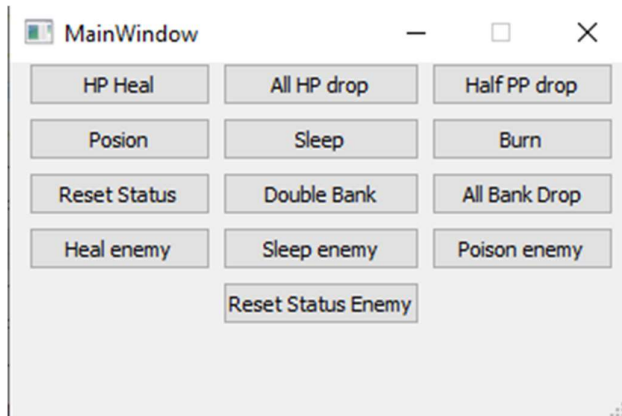

5. Open the emulator VBA-rr-svn480.exe

Also make sure to change your inputs since I'm using a French keyboard layout.

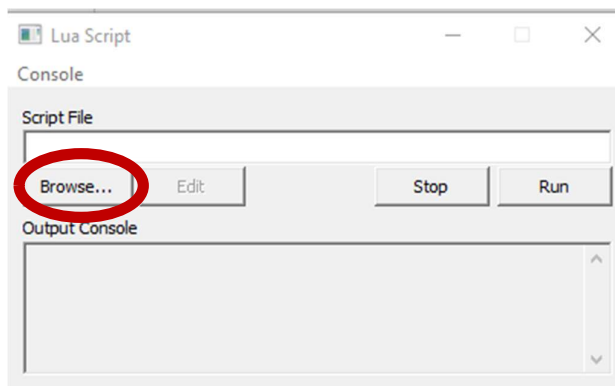

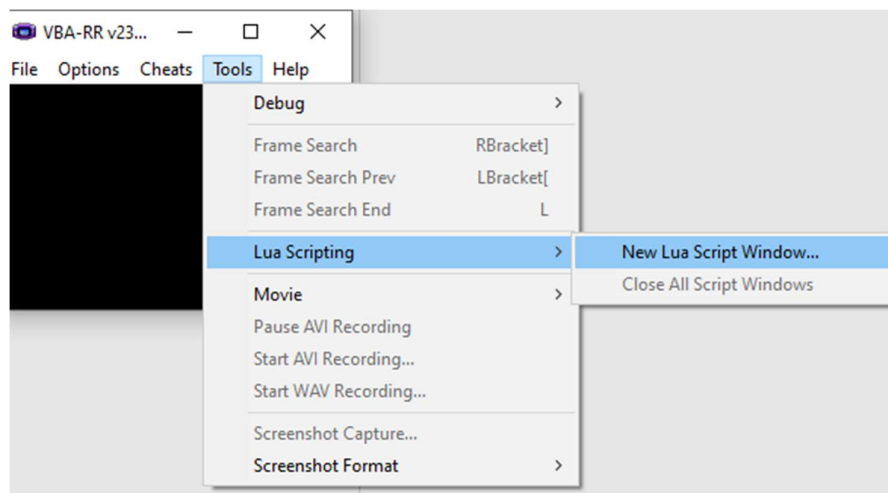

How To Start the Game (do these steps every time you launch the game)

6. Start main.exe

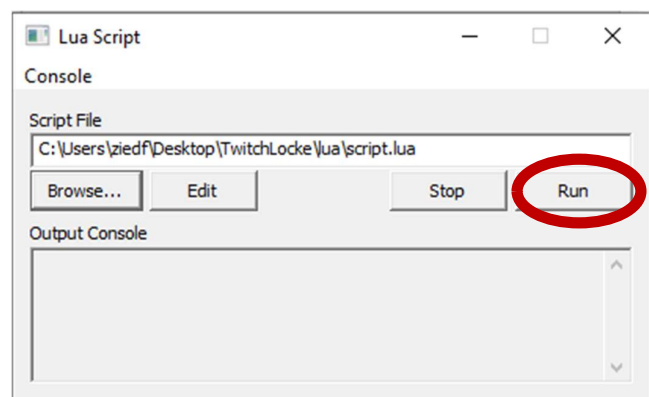

You can manually choose an action using this window, or just wait for someone to use the extension to choose one

7. The emulator VBA-rr-svn480.exe will start on its own (if it's not already up)
8. Load the rom: File>Open GBA ROM
9. Load the script (this script reduces some visual bugs ingame)

Click Browse>Choose script.Lua

Run the script
